PATENT Atty. Dkt. No. WEAT/0173.C1

## IN THE CLAIMS:

Please amend the claims as follows:

1-21. (Canceled)

- 22. (Currently Amended) The method <u>assembly</u> of claim [[46]] <u>53</u>, further comprising transmitting a signal from at least one sensor located below the <u>axially extendable</u> tool and adjacent to the <u>signal transducing</u> downhole device.
- 23. (Currently Amended) The method assembly of claim 22, wherein the at least one sensor measures temperature.
- 24. (Currently Amended) The method assembly of claim 22, wherein the at least one sensor measures pressure.
- 25. (Currently Amended) The method assembly of claim 22, wherein the signal transducing downhole device is a drill bit and one or more of the at least one sensors measures chemical characteristics of a fluid around the drill bit.
- 26. (Currently Amended) The method <u>assembly</u> of claim [[46]] <u>53</u>, wherein the <u>signal</u> <u>transducing</u> downhole device is a thruster <del>and actuating the thruster is</del> <u>actuatable</u> by an electrical transmission from a surface of <u>a well</u> <u>the wellbore</u>.
- 27. (Currently Amended) The method assembly of claim [[46]] 53, wherein the signal transducing downhole device is a drilling hammer and actuating the drilling hammer is actuatable by an electrical transmission from a surface of a well the wellbore.
- 28. (Currently Amended) The method <u>assembly</u> of claim [[46]] <u>53</u>, wherein the <u>signal</u> <u>transducing</u> downhole device is a stabilizer <del>and actuating the stabilizer is</del> <u>actuatable</u> by an electrical transmission from a surface of <u>a well the wellbore</u>.

PATENT Atty. Dkt. No. WEAT/0173.C1

- 29. (Currently Amended) The method assembly of claim [[46]] 53, wherein the signal transducing downhole device is a rotatable steering apparatus and actuating the rotatable steering apparatus actuatable is by an electrical transmission from a surface of a well the wellbore.
- 30. (Currently Amended) The method assembly of claim [[46]] 53, wherein the signal transducing downhole device is a vibrator and actuating the vibrator is actuatable by an electrical transmission from a surface of a well the wellbore.
- 31 46. (Cancelled)
- 47. (Currently Amended) The method assembly of claim [[46]] 53, wherein the signal path includes a wall of the signal conducting axially extendable tool.
- 48. (Currently Amended) The method assembly of claim 47, wherein the signal transducing downhole device is a drill bit.
- 49. (Currently Amended) The method assembly of claim 47, wherein the signal transducing downhole device is a vibrator and actuating the vibrator is actuatable by an electrical transmission from a surface of a well the wellbore.
- 50. (Currently Amended) The method assembly of claim 47, wherein the signal transducing downhole device is a rotatable steering apparatus and actuating the retatable steering apparatus is actuatable by an electrical transmission from a surface of a well the wellbore.
- 51-52. (Cancelled)
- 53. (Currently Amended) An assembly for use in a wellbore, comprising: a tubular string;

Page 4

PATENT Alty. Dkt. No. WEAT/0173.C1

a signal transducing downhole device; and

an axially extendable tool located between the <u>signal transducing</u> downhole device and an upper end of the tubular string, comprising:

- a signal path therethrough,
- a flow path therethrough,
- a housing,
- a mandrel axially movable relative to the housing, and
- an axially displaceable electrical coupling between the housing and the mandrel.
- 54. (Previously Presented) The assembly of claim 53, wherein the signal path is isolated from the flow path.
- 55. (Previously Presented) The assembly of claim 53, wherein the signal path is isolated from any flow path through the axially extendable tool.
- 56-58. (Canceled)
- 59. (New) The assembly of claim 53, wherein the axially displaceable electrical coupling comprises a plurality of contacts disposed on a surface of one of the housing and the mandrel and at least one contact disposed on a corresponding surface of the other of the housing and the mandrel.
